

CLAIMS

I claim:

- 1 1. A portable presentation display case comprising:
2 a plurality of lightweight, rigid panels, each panel having a
3 front surface and a rear surface, wherein the front surface is
4 covered with a hook fastener compatible material and the rear
5 surface is covered with a rigid material;
6 a rigid support frame, which encapsulates each of said
7 plurality of panels and said front and rear surfaces;
8 a hinge connecting said panels to one another allowing the
9 panels to fold from an open position to a closed position; and
10 a handle fixedly secured to the top of one of said panels;
11 whereby in said open position the portable presentation
12 display is a free standing display device for exhibiting objects
13 of interest, and in said closed position the panels are folded
14 providing a light weight portable presentation display that allows
15 for display of objects of interest on said rear surface.
- 1 2. The portable presentation display case of claim 1,
2 wherein the rear surface of each of said plurality of panels is
3 formed from a thermoplastic polymer.

1 3. The portable presentation display case of claim 2,
2 wherein the rear surface of each of said plurality of panels is
3 corrugated.

1 4. The portable presentation display case of claim 2,
2 wherein the rear surface of at least one of said plurality of
3 panels has an embossed area.

1 5. The portable presentation display case of claim 1,
2 wherein each of said panels is formed from a rigid polystyrene
3 foam material.

1 6. The portable presentation display case of claim 1,
2 wherein the rear surface of each of said plurality of panels is
3 formed of acrylonitrile butadiene styrene (ABS).

1 7. The portable presentation display case of claim 1,
2 wherein said support frame is formed from a rigid polyvinyl
3 chloride (PVC) compound.

1 8. The portable presentation display case of claim 7,
2 wherein said support frame has a lip that extends slightly beyond
3 said front surface.

1 9. The portable presentation display case of claim 1,
2 wherein the display case is comprised of a center panel, and two
3 outer panels, the outer panels approximately half the width of the
4 center panel.

1 10. A portable presentation display case comprising:
2 a center panel and two hingedly connected wing panels, the
3 panels formed of lightweight rigid material, each panel having a
4 front surface and a rear surface, wherein the front surface is
5 covered with a hook fastener compatible material and the rear
6 surface is covered with a rigid material wherein the wing panels
7 are approximately half the width of the center panel;

8 a PVC support frame encapsulating each of said panels within
9 said front and rear surfaces; and

10 a handle fixedly secured to the top of one of said panels;
11 whereby in an open position the portable presentation display
12 is a free standing display device for exhibiting objects of
13 interest, and in a closed position the panels are folded providing

14 a light weight portable presentation display that allows for
15 display of objects of interest on said rear surface.

1 11. The portable presentation display case of claim 10,
2 wherein said support frame has a lip that extends slightly beyond
3 said front surface.
